👤 PROFILE

Technically sophisticated, competent, and innovative IT professional, with experience in web & hybrid mobile programming, business analysis, IT management, business intelligence, and integration of enterprise applications.

I am also a full-stack software engineer currently conducting React/Node.js and Vue.js development in day-to-day work while having multiple years of experience as freelancer offering services of crafting online stores on platforms as Shopify/Shopify Plus and BigCommerce.

My goal has been building elegant, professional-looking, and performant-focused solutions that support my enterprise and small business clients in continuing growth.

💼 EMPLOYMENT HISTORY

Senior Shopify developer at Hotel Collection, Miami

April 2020— July 2023

My responsibility at this company was to build custom Shopify themes and apps, and maintain 3 Shopify Plus stores. I've also worked on designing email templates that works with Mailchimp, Klaviyo, and the other major email marketing platforms.
Apart from the development tasks, I've been assigned to some other tasks that require digital marketing skills and expertise.

React.js frontend developer at Brooks&Grant, Leicester

February 2019 — March 2020

My responsibility at this company was to build and maintain 2 headless e-commerce stores using React.js, Gatsby, and Shopify. I have successfully built those headless e-commerce stores that have been optimized to deliver high-speed websites and shopping experiences to the end-users.

Vue.js frontend developer at Quarry team, Remote | Globally distributed

April 2018 — January 2019

- Built the company website using Vue.js and Gridsome
- Design NoSQL databases such as DynamoDB, MongoDB
- Implementing UX/UI to the responsive Vue.js frontend
